EDUCATION & CERTIFICATION

B.S. Computer Science – National American University (2016)
A.S Finance & Accounting – University of Phoenix (2011)
IBM – Database and SQL for Data Science with Python

EXPERIENCE HIGHLIGHTS

10+ years in Data Analytics & Engineering
Industries: Marketing, Telecom, Retail, Finance

Professional Summary:

- Data Analyst with deep experience delivering high impact analytical solutions across marketing, telecom, retail, and finance, specializing in turning complex datasets into actionable insights that drive measurable business outcomes.
- Expert in advanced analytics, AI, and ML applications, including predictive modelling, forecasting, anomaly detection, automated financial workflows, and end to end ETL pipeline design using Python, PySpark, SQL, Snowflake, AWS, and Databricks.
- Developed advanced Excel models (complex formulas, pivots, scenarios, VBA) to translate M&A findings, volume trends, and data-driven insights into clear, actionable narratives for C-suite and non-technical stakeholders, and served as a strong executive-level communicator skilled at presenting complex analytical and financial insights through high-impact PowerPoint presentations.
- Proven success leading large scale data quality and optimization initiatives, deduplicated 150M+ records with zero data loss, engineered cloud pipelines delivering 87.5% faster processing and \$250K annual savings, and built ML forecasting models achieving 94%+ accuracy with multimillion dollar impact.
- Skilled in developing interactive BI dashboards and data products using Power BI (DAX), Tableau, and Snowflake; improved dashboard performance by 25% through optimized data governance, modelling, and validation frameworks.

Skills:

Skills	Clients	Total years of experience
Data Analyst	Support Optics, Syilum LLC, AT&T, Signet Jewelers	8+ years
SQL	Support Optics, Syilum LLC, AT&T, Signet Jewelers	8+ years
Excel	Support Optics, Syilum LLC, AT&T, Signet Jewelers	8+ years
AI/Machine Learning	Support Optics, Syilum LLC, AT&T, Signet Jewelers	8+ years
Power BI	Support Optics, Syilum LLC, AT&T, Signet Jewelers	8+ years

Technical Skills:

- **Data Platforms & Cloud:** Snowflake, Amazon Redshift, AWS (Glue, AppFlow, S3, CloudWatch), IBM Cloud Pak for Data, Databricks
- **Programming & Analytics:** SQL (Advanced: CTEs, Window Functions, Query Optimization), Python (Pandas, NumPy, PySpark), Statistical Analysis, Machine Learning
- **ETL & Data Engineering:** AWS Glue (PySpark), Fivetran, dbt, Talend, Data Warehousing, Data Modelling, Pipeline Orchestration

- **Visualization & BI:** Power BI (DAX, Power Query, Service), Tableau, Looker, Advanced Excel, KPI Dashboard Development
- **CRM & Business Tools:** Salesforce (SFDC, Bulk API 2.0, Data Loader), Workfront, ZoomInfo, Google Analytics
- **Project Management:** Jira, Confluence, Agile/Scrum, Sprint Planning, Backlog Management, RACI Matrix, RICE Prioritization
- **Specializations:** Data Deduplication, Data Governance, HIPAA Compliance, A/B Testing, Financial Modelling, Predictive Analytics

Core Competencies:

- | | |
|--|---|
| <ul style="list-style-type: none">• Data Engineering & ETL Pipelines• Business Intelligence & Analytics• Machine Learning & Predictive Modelling• Data Governance & Quality Assurance• Dashboard Development & Visualization• Process Automation & Optimization | <ul style="list-style-type: none">• Cloud Data Warehousing (Snowflake, Databricks, AWS)• Agile Project Management• Cross-Functional Collaboration• Financial Modelling & Forecasting• Marketing Analytics & Campaign ROI• Healthcare Data Analysis (HIPAA) |

Education:

B.S. Computer Science – National American University (2016)
A.S Finance & Accounting – University of Phoenix (2011)
IBM – Database and SQL for Data Science with Python

Work Experience:

Freelance Business Intelligence Analyst | October 2025 – Present
Syilum LLC – Atlanta, GA (Remote)

- Provide business intelligence and analytics consulting for technology company, delivering SQL-based insights and interactive dashboards supporting product and operational decision-making*
- **Build Power BI dashboards** tracking product KPIs (user engagement, feature adoption, retention) for product management and executive stakeholders
 - **Write SQL queries** analysing user behaviour patterns, conversion funnels, and feature usage informing product roadmap priorities
 - **Partner with product** and engineering teams translating business questions into data analysis and actionable recommendations
 - **Develop data quality** validation frameworks ensuring 99%+ accuracy for executive reporting
 - Create self-service analytics solutions reducing ad-hoc report requests by 60%

Technologies: SQL | Power BI | Snowflake | Python | Git

Signet Jewelers, Contract – (Remote)	Jun 2025 - Sept 2025
Data Analyst	

- Designed and implemented automated M&A financial data integration platform using Databricks, Python, and SQL to support due diligence and standalone financial statement preparation for acquisition targets.
- **Data Platform Architecture:** Built Databricks Lakehouse with medallion architecture (bronze/silver/gold) integrating SAP FICO, Oracle Financials, and legacy ERPs; processed 15.2M+ GL and sub-ledger records with complete audit trail for SOX compliance
- **Financial Consolidation Automation:** Developed Python notebooks automating GL extraction, chart of accounts mapping (350+ rules), and GAAP policy harmonization (ASC 606/842); reduced consolidation timeline from 6 weeks to 5 days
- **Accounting Policy Translation:** Implemented revenue recognition adjustments, depreciation method harmonization, inter-company eliminations, and purchase accounting logic enabling accurate pro-forma financial statements
- Demonstrated curiosity and initiative by integrating AI and machine learning capabilities into Databricks-based financial workflows, including automated GL anomaly detection, intelligent chart of accounts mapping, and predictive error flagging, transforming a manual 6-week consolidation process into a 5-day automated pipeline.

- Developed executive presentations and financial models using Advanced Excel (complex formulas, pivot tables, scenario analysis, VBA macros) and PowerPoint to communicate M&A findings, volume trends, and deal impact to C-suite stakeholders, translating complex financial data into clear, actionable narratives for non-technical audiences.
- Led end-to-end deduplication of 150M+ customer and transaction records by designing a business-criteria matching strategy and scalable AWS/Redshift SQL pipeline; orchestrated ETL with AWS Glue and automated CRM syncs to Salesforce using AWS AppFlow and Bulk API 2.0.
- Built production-ready deduplication pipeline in Amazon Redshift using advanced SQL (CTEs, window functions, staging tables) to score, identify, consolidate, and flag duplicates with full audit trail.
- **Data Quality & Validation:** Build automated trial balance reconciliation framework achieving 99.8% accuracy; identified \$12.6M in accounting errors across 4 transactions enabling purchase price adjustments
- **Executive Reporting:** Created Power BI dashboards with DAX measures for EBITDA analysis working capital trends, and financial KPIs; configured DirectQuery to Databricks SQL endpoints with row-level security for deal confidentiality
- **M&A Deal Support:** Enabled \$450M+ in successful acquisitions; financial forensics uncovered \$4.8M revenue recognition error leading to \$3.2M price renegotiation on single deal

Technologies: Databricks | Delta Lake | PySpark | Python | Advanced SQL | SAP FICO | Oracle Financials | Power BI | ETL | Medallion Architecture | Excel | PowerPoint

AT&T – Atlanta, GA

Mar 2024 - Mar 2025

Data Analyst – Senior

Business Intelligence -BI | Predictive Analytics | Process Automation | Data Integration

- Developed predictive ML model to forecast project completion timelines, enabling proactive decision-making, optimized resource allocation, and improved operational efficiency across marketing operations.
- Automated data ingestion pipelines using APIs and Fivetran/dbt, reducing manual data retrieval by 40% and enabling near-real-time analytics.
- **Advanced Analytics & Machine Learning** – Engineered a predictive machine learning model to forecast project completion timelines, enabling proactive decision-making, optimizing resource allocation, and enhancing operational efficiency across teams.
- **Leveraged Advanced Excel** (VBA macros, Power Query, dynamic pivot tables, What-If analysis) alongside PowerPoint to develop strategic presentations for Finance, HR, Marketing, and IT leadership; translated complex data from Snowflake and Power BI into compelling visual narratives highlighting volume trends, cost drivers, and actionable recommendations.
- **Data Governance & Quality Assurance** – Designed and implemented a robust data validation framework, ensuring data integrity and consistency across Snowflake and Power BI reports. Optimized dashboard performance, reducing refresh times by 25% and enhancing real-time data availability for key stakeholders.
- Designed comprehensive data validation framework improving data integrity across Snowflake and Power BI; reduced dashboard refresh times by 25% for real-time stakeholder insights.
- Build interactive Power BI dashboards visualizing compensation trends, workforce costs, and budget allocations for executive-level financial planning and strategic decision-making.
- Integrated Workfront API with Snowflake for centralized marketing analysis, creating unified data models across disparate systems.
- **Led Agile ceremonies:** backlog management and sprint planning using story points and RICE methodology to prioritize high-impact deliverables.
- Collaborated with Finance, HR, Marketing, and IT stakeholders, leading data discovery sessions and aligning analytics with organizational goals.
- Integrated and optimized data enrichment platforms (ZoomInfo, Salesforce SFDC, Custom Windows Form) Enhancing data accuracy and completeness for strategic decision-making.

Technologies: Power BI (DAX) | Snowflake | Advanced SQL | Python (Pandas, NumPy) | Tableau | Workfront API | Machine Learning | Salesforce | Fivetran | dbt | Excel | PowerPoint

Syilum LLC – Atlanta, GA

Jan 2016 - Mar 2024

Product Data Analyst

Product Analytics | Data Integration | CRM Analytics | Campaign Operations | Financial Modelling

- Analyzed campaign performance across multiple marketing channels, measuring ROI, customer acquisition costs, conversion rates, and lifetime value – providing actionable insights that optimized marketing spend and increased campaign efficiency by 22%
- Maintained data integrity across enterprise platforms by implementing automated quality checks and validation rules using Python and Talend, ensuring 99%+ accuracy for downstream analytics and operational decision – making.
- Analyzed software product performance by tracking user behaviour, engagement metrics, and feature adoption; conducted A/B testing, user research, and competitor analysis to guide product enhancements.
- Designed KPI dashboards in Power BI tracking product success, adoption rates and operational efficiency for executive stakeholders.
- Partnered with cross-functional teams (Product, Marketing, Finance, IT) on process optimization, automation, and analytics-driven decision-making.
- Implemented automated data quality checks using Python and Talend, ensuring high – quality datasets for predictive modelling and reporting.
- Conducted campaign performance analysis measuring ROI, customer acquisition costs, and conversion rates across multiple marketing channels.
- Conducted user research and behavioural analysis to identify high – value customer segments, informing product enhancement strategies and targeted marketing initiatives that increased feature adoption by 23%.
- Initiated budgeting, forecasting, and financial modelling to optimize marketing spending and improve cost efficiency.
- Developed customized Workfront reports to analyze project data, track KPIs, and provide operational improvement insights.
- Utilized Snowflake and SQL to query, clean, and structure large datasets; built ETL pipelines for data transformation.
- Led data governance initiatives ensuring data quality, security, and compliance across platforms.

Technologies: Power BI | Snowflake | SQL | Python | Workfront | Databricks | Talend | IBM CP4D | Excel | PowerPoint

Support Optics

Jan 2013 - Jan 2016

Data Analyst

Finance, Business Intelligence (BI), Healthcare

- Delivered actionable insights for clients across finance, business intelligence, and healthcare through in-depth data analysis and research.
- Finance: Designed data collection methodologies improving accuracy and reliability; analyzed financial data to identify trends, optimize resource allocation, and support investment strategies.
- Business Intelligence: Developed interactive dashboards and reports using Power BI, Tableau, and Excel enabling clients to track KPIs and improve operational efficiency.
- Healthcare: Analyzed large healthcare datasets identifying patterns and quality improvement opportunities; developed predictive models forecasting healthcare outcomes.
- Performed statistical analysis including regression, hypothesis testing, and clustering to extract insights and improve business strategies.
- Conducted data validation and quality assurance ensuring accuracy, consistency, and integrity of datasets.

Technologies: SQL | Python | Tableau | Power BI | Statistical Modelling | Predictive Analytics | Excel | PowerPoint
